

Your integrity is NOT worth your Algebra 2 grade. DO YOUR OWN WORK!

Dear Algebra 2 Students & Guardians,

The mathematical “step” from Geometry to Algebra 2 can be very challenging if students have trouble remembering the material covered in Algebra 1. The Algebra 2 staff met and came up with a brief review of topics that we have found to be areas students most commonly struggle to remember. We created a concise Algebra overview to help students be successful in bridging the knowledge gap that often occurs between Geometry and Algebra 2. **This assignment is not mandatory but highly recommended.**

Students who do not take the time to identify and address these potential gaps may find it difficult to be successful in Algebra 2. What experience has taught us is that students who do not take the summer assignment seriously have a higher probability of earning a C or below in the course and run the risk of not discovering their knowledge gaps until after the course drop date.

This three-page Algebra overview can be turned in as an **extra credit** assignment to your regular Algebra 2 or Algebra 2 Daily teacher the first week of school. If you need help remembering any of the concepts, watch the associated videos (listed at the end of this packet).

Parents, we would like to suggest that after a healthy break from school, (say sometime in July) you encourage your students to take the time to work through the Algebra review. This is not required, but we truly believe that it will make the learning curve for next year’s math classes feel less steep. This review should help cut down on anxiety, stress and the amount of time homework will take.

Our hope is that you have a restful summer, and that everyone returns to school refreshed and ready to enter the exciting realm of Algebra 2.

We are looking forward to meeting you in the fall!

—The Algebra 2 Teaching Team

Essential Algebra Summer Review

The purpose of this review is to remind you of vital algebra skills necessary to succeed in Algebra 2. Mastering these core concepts will greatly improve your ability to do well in this rigorous course. If you need help remembering any of the topics, watch the associated videos (listed at the end of the packet). We are looking forward to meeting you in the fall! – The Algebra 2 teaching team 😊

Directions: Do your work on a **separate** sheet of paper, **box answers**, and show **ALL** work.

Order of Operations: Evaluate each expression.

1. $9 - 32 \div 4$

2. $8 \times \frac{15}{5} - (5 + 9)$

3. $(2 + 6 \times 2 + 2 - 4) \times 2$

4. $20 \div (4 - (-10 + 8))^2$

Properties of Exponents: Simplify. Your answer should contain only positive exponents.

5. $2k^4 \cdot 4k$

6. $4v^3 \cdot vu^2$

7. $(4a^3)^2$

8. $(2x^0y^2)^{-3} \cdot 2yx^3$

9. $\frac{2x^4y^{-4}z^{-3}}{3x^2y^{-3}z^4}$

10. $\frac{2x^2y^4 \cdot 4x^2y^4 \cdot 3x}{3x^{-3}y^2}$

Multiplying Polynomials: Find each product.

11. $6v(2v + 3)$

12. $(x + 3)(x - 3)$

13. $(x + 3)(6x - 2)$

14. $(4n + 1)(2n + 6)$

15. $(2p - 1)^2$

Factoring Quadratic Polynomials: Factor.

16. $a^2 + 11a + 18$

17. $n^2 - n - 56$

18. $x^2 + 4x - 12$

19. $2v^2 + 11v + 5$

20. $5x^2 - 18x + 9$

Your integrity is NOT worth your Algebra 2 grade. DO YOUR OWN WORK!

Radical Expressions: Simplify, give exact answer (no decimals).

21. $\sqrt{96}$

22. $\sqrt{64x^2y^2}$

23. $2\sqrt{8p^2q^2r}$

24. $\sqrt{20x^2} \cdot \sqrt{20x}$

25. $\frac{\sqrt{4}}{5\sqrt{3}}$

26. $\sqrt{20} + \sqrt{45}$

Finding the Slope of a Line:

- From a graph:

- From an equation

28. $y = \frac{7}{2}x - 2$

29. $6x + 5y = 20$

- Find the slope of the line through each pair of points

30. $(3, -20), (5, 8)$

31. $(12, -18), (-15, -18)$

Graphing Lines, Inequalities, and Absolute Values: Sketch the graph of each function.

32. $y = \frac{7}{2}x - 2$

33. $6x + 5y = 20$

34. $y > -x - 5$

35. $y = |x| + 2$

36. $y = |x + 2|$

Your integrity is NOT worth your Algebra 2 grade. DO YOUR OWN WORK!

Solving Systems of Equations:

- Solve each system by elimination.

37. $x - y = 11$

$2x + y = 19$

38. $-4x + 9y = 9$

$x - 3y = -6$

- Solve each system by substitution.

39. $-7x - 2y = -13$

$x - 2y = 11$

40. $y = 5x - 7$

$-3x - 2y = -12$

- Sketch the solution to the system of inequalities.

41. $x \leq -3$

$y > -\frac{5}{3}x - 2$

Quadratic Functions: Find the zeros of the functions by factoring.

42. $f(x) = x^2 - 5x - 6$

43. $h(x) = x^2 - 4x$

44. $5x^2 + 20 = 20x$
