## Setup Notes:

We need to pull apart one of the table groups that is only 2 tables and add those 2 extra tables to the other 2-table groups so we can have 5 groups of 3 tables. There needs to be 30 chairs per room, so don't take chairs from other rooms :)

Also, we need to take a picture of the rooms before we move the desks around so we can return them to their regular arrangement before the next class.

THANK  
YOU
